

## THE BEST WAY TO RUN YOUR CASINO PARTY

We handle everything for you! Based on over 35 years of experience, here's the best way to organize a casino party with prizes. Please note that cash prizes are prohibited, and certain gift cards (AMEX, VISA, MasterCard, and Amazon) are considered cash equivalents.

### GETTING STARTED

**Chip Distribution:** Guests receive their initial chips at their first gaming table.

**Starting Amount:** We recommend starting with \$200 in chips per guest. This amount can be adjusted to your preference—just let us know so we can prepare the appropriate denominations.

### CHIP MANAGEMENT

#### Chips Stay at the Tables:

- Guests don't carry chips between tables.
- Dealers issue vouchers for the chips guests hold when they leave a table.
- Guests present the voucher at their next table to resume play with their current chip balance.

### CHIP DENOMINATIONS & BETTING

#### Chip Values:

- Red: \$5
- Green: \$25
- Black: \$100
- Optional: Red w/ White Stripe: \$500, Blue w/ White Stripe: \$1,000
- *Roulette uses unique chips to identify players.*

#### Betting Limits:

- Recommended: Minimum \$5, Maximum \$200
- These limits can be customized to your event.

### RUNNING OUT OF CHIPS

If a guest runs out of chips, we suggest giving them an additional allotment (e.g., \$200). The goal is to keep everyone engaged and having fun, even when prizes are involved.

## **CASHING OUT**

At the end of the event:

- Guests exchange chips for two-part raffle tickets (provided at no charge).
- Example: \$50 in chips = 1 raffle ticket. More chips mean more tickets and better odds of winning.

## **PRIZE DISTRIBUTION OPTIONS**

1. **Announce Winning Numbers:** Draw raffle tickets and call out winners for each prize.
2. **Raffle Baskets (Recommended):** Display prizes with a basket in front of each one. Guests place one half of their ticket into the basket of the prize they want to win.

This method ensures a seamless, enjoyable event for all guests!
